Correct envelope address format australia

The format of the Australian postal address is closer to the format of the US than the FORMAT of the UK, but differences are easy to spot. UK address format AUS address format Mr Fred Banana Flat 3 26 Bucket Road Essex SS5 3DD UK Ms Olivia Orange 7/4 Spade Street PORT DOUGLAS QLD 4877 AUSTRALIA 1. The second row must contain the number of the building and its street name. 2. If you have an apartment, suite or unit number, you can put it at the beginning of this line and then a slash. However, if you have a floor number, then it should be done, for example, floor 5. It seems counter-intuitive, but if you have a floor and apartment/suite/unit number, you'll need to put the apartment/suite/unit number on your own in the second row (e.g. Apartment 7), followed by the floor number, building number and street name along with the third row. 3. The last line (except country) shall indicate the name of the city/suburb, preferably in capital letters followed by the acronym for the state (in the example above, QLD for Queensland). 4. On the same line, after the status, add the four-digit zip code. 5. In the case of an international entry, type the country name in capital letters under the address. UK address format AUS address format Ms Jenny Smith Transglobal Express PO Box 1234 Bromborough CH62 3NX UK Andy Appleton Surfin' Sam Ltd Suite 10a 11 Hinkley Road DAWES POINT NSW 2000 AUSTRALIA 1. Place the MAILBOX under the individual and company names. 2. If you send it to a mailbox, do not indicate the street name or building number in the address. Choose from the best international couriers, including UPS, DHL and TNT. How to write an Australian address If you send packages to Australia from the United States, you can avoid delays and the risk of losing the package, ensuring it is handled correctly. To present the Australian title, we set an example of an American address next to an Australian title, so we compare them. You'll notice that the Australia address format is the same as the U.S. address format, and the city, state, and Australia zip code appear in the same row. This keeps things simple when it comes to correctly addressing mail to Australia from the US. If the recipient lived in an apartment, he would place the apartment number and then a slash in front of the street number. E.g. 17/98 Shirley Street. Step 2 In the row after the street address, you must enter the zip code of the city, state and Australia. This should all appear on the same line as shown in the Australia address format above. Like the U.S. address, you must specify the abbreviation for the state or territory where the city or city is located. Our example shows QLD, which is short for Queensland. Australian State abbreviations state or territory Abbreviation Queensland QLD New South Wales NSW Australian Capital Territory ACT Victoria VIC Tasmania TAS Northern Territory NT South Australia SA Western Australia WA Step 3 Last row, enter the country name.
